Abstract

Dhatura (Datura innoxia Mill.) belongs to family Solanaceae describe in *Ayurveda* for the various types of treatments to cure disease conditions in Classical texts. As a named the people knows *Dhatura* a very dangerous toxic plant. But, in presented review article, an attempt has been made to compile critically its informations related to therapeutic uses of *dhatura* from more than three *samhitas*, nine *samgraha granthas*, seven *nighantus* and other published texts. It is observed that root, root bark, leaves, seed, oil of *Dhatura* are used as an ingredient in 521 formulations, which are effective in more than 50 disease conditions. The main indications include *vatavyadhi* (diseases of joints), *aamavata* (rheumatoid artharitis), *vrana* (wound), *agnimandya* (loss of appetite), *jvara* (fever), *grahani* (Irritable bowel syndrome), *shiroroga* (disease of head), *Shotha* (inflammation), *hikka* (hiccough), *kushtha* (skin disease), *visarpa* (erysipelas), *arsha* (piles) etc. Different parts of *Dhatura* are used in about 18 dosage forms; such as *svarasa* (juice), *kvatha* (decoction), *lepa* (paste), *varti* (suppository), *avaleha* (semi-solid preparations), *taila* (oil), *rasa* (mineral preparation), *vati* (pills), *modaka* (solid dosage form), *ghrita* (fat soluble preparations), *churna* (powder), *dhumrapaan* (smoke inhalation), etc.

Key words: *Ayurveda*, *Dhatura*, *Datura innoxia Mill.*, therapeutic importance, toxic plant.

INTRODUCTION

The medical science of India incorporates very rich material medica making comprehensive and multipurpose uses of drugs obtained from all the three origins viz. plant, mineral and animal, where maximum drugs are of plant origin¹. *Dhatura*, one of the classical drugs of plant origin, botanically identified as *Datura innoxia Mill.*, has been used by the *Vaidyas* of *Ayurveda*, for the management of different disease conditions².

Dhatura (Datura innoxia Mill.) is found common in districts of central and South India, especially in temperate and warmer regions of India. Whole plant densely clothed with grayish tomentum. Stem erect 3-4 ft. high, stout herbaceous³.

Texts of *Ayurveda*, systematically recorded the varieties, synonyms, part used, pharmacological properties, actions and indications of *Dhatura* in the respective texts, in their style of presentation. Its use, as an ingredient of compound formulations is recorded in *samhitas* (treatise) as well as in *samgraha granthas* (compendia of *Ayurveda*).

On the other hand the local people knows the dhatura as weed, which is easily grows near road side area and they having fear to touch this plant. They are hving the image of *Dhatura* as a highly toxic plant. But the *Ayurveda* provides the precious uses of *Dhatura*.

On review it is observed that no single hand information is available regarding the uses and indications of *Dhatura* as delinated in classical texts of Ayurveda. Hence, in this article, an attempt has been made to present the same.

MATERIAL AND METHODS

Various available *samhitas* (classical texts), *nighantus* (lexicons), *samgraha granthas* (compendia) and some other texts related to *prayoga* were referred; the synonyms, properties, actions and various formulations with their *adhikara* (prime indication) were compiled, critically analyzed and arranged in a systematic manner.

RESULTS AND DISCUSSION

Ayurvedic lexicon describes the plant drug through *paryaya* (synonyms). On the basis of reported synonyms, it is observed that *Dhatura* is of three varieties i.e. *Sweta* (white), *Raja & Krishna* (Black). *Sweta dhatura*, *Raja dhatura* & *Krishnadhatura* were attributed 31, 7 & 7 synonyms respectively, for describing its morphological and pharmacological characters, in various texts. (Table 1, 2 & 3)

Synonyms attributed to *Sweta Dhatura* indicate that it is small herb. Its seeds are highly narcotic. For describing its morphological and pharmacological charactors in various texts.

PHARMACOLOGICAL PROPERTIES OF DHATURA

Dhatura has attributed with katu, kashay, madhura, tikta rasa, katu vipak and ushna virya, guru guna. It specifies kapha-vata dosha (Table 4).

It is being recommended to alleviate various disease conditions like *shula* (pain), *jwara* (fever), *gulma* (abdominal lump), *arsha* (piles), *krimi* (worms), *mutravikara* (urine disorder), *vrana* (wound), *agnimandya* (loss of appetite), *kushtha* (skin disease), *visha* (poison), *swasa* (asthama), *unnmada* (mental disorder).

DHATURA IN CLASSICAL TEXTS

Samgraha granthas (different pharmacopoeia) of ayurveda reports about 521 formulations having *Dhatura* as an ingredient (Table 5). It is used both internally (423) as well as externally (96) and 2 formulations are used internally and externally, in various dosage forms such as *svarasa* (expressed juice), *kvatha* (decoction), *churna* (powder), *taila* (oil), *ghrut* (ghee), *avaleha* (confectionaries), *dhumrapaan* (smoke inhalation), *lepa* (paste), *varti* (suppositories), *rasa* (mercurial preparation), *vati* (tablet), *modak* (solid dosage form) (Table 5).

It is observed that has been used as an ingredient 521 formulations comprising of 423 internal and 96 external formulations and 2 formulations are internal as well as external. In external application the formulations are indicated for *gradhrasi* (Sciatica), *kushtha* (skin disease), *jalodara* (ascites), *shiro roga* (disease of head), *masa* (mole), *visarpa* (erysipelas), *vipadika* (scaly lesions on palms and soles), *vata rakta* (gout), *stri roga* (gynecological disorder), *vrana* (wound), *shlipad* (filariasis), *vatavyadhi* (disease of joint), *netra roga* (eye disease), *krumi* (worms), *shotha* (inflammation).

Formulations for internal administration disease conditions like *sannipata* (vitiation of all doshas), *arsha* (piles), *grahani* (irritable bowaldisorder), *hikka* (hiccough), *kasa* (cough), *jwara* (fever), *kshaya* (pulmonary tuberculosis), *kushtha* (skin disease), *shula* (pain), *stri roga* (gynecological disorder), *vatarakta* (gout), *rasayan* (rejuvenating agent), *gulma* (abdominal lump), *karna roga* (ear disorder), *mutrakrichcha* (dysuria), *shlipad* (filariasis), *vrana* (wound), *unmada* (insanity), *apasmara* (epilepsy), *krumi* (worms), *atisara* (diarrhoea), *rajayakshama* (tuberculosis), *agnimandya* (loss of appetite), *visarpa* (erysepales), *vata vyadhi* (disease of joints), *vajikaran* (aphrodisiac).

Highest number of formulation was found in *jwara* (75), *vajikaran* (24), *unmada* (15), *kushtha* (20).

It is observed that seed of dhatura being used highest number of formulations (270), followed by oil (9), leaves (163), fruit (20), root (44), flower (2), *panchang* (9).

PART USED & DOSE³³: Root - 1gm to 4gm, Leaves juice – 5gm to 10gm, Seeds - 240mg

FORMULATIONS OF DHATURA:

Various *sangraha granthas* (compendias) were scrutinized for the formulations containing *Dhatura* as an ingredient and mentioned in Table-5.

CONCLUSION:

Dhatra (*Datura innoxia* Mill.) is found common in tropical parts of India to temperate parts of Himalayas. Mainly three variety of *Dhatra* are found in various *nighantus* i.e. *sweta dhatra*, *rajadhattura* & *krishnadhatra*. *Dhatra* is attributed with pharmacological properties i.e. *katu*, *kashaya*, *madhura*, *tikta rasa*, *katu vipak* and *ushna guna*; useful to combat various disease conditions such as *kushtha* (skin disease), inflammation, gout, fever, pain, etc. it is used in more than 521 classical formulations, more than 18 dosage forms, used in about 50 diseased conditions, 96 external, 423 internally and 2 externally as well as internally used.
